NDN for Cog Network to Support Next Generation Social Systems

Arata Koike and Yoshiko Sueda
NTT Network Technology Labs.
Nippon Telegraph and Telephone Corp.

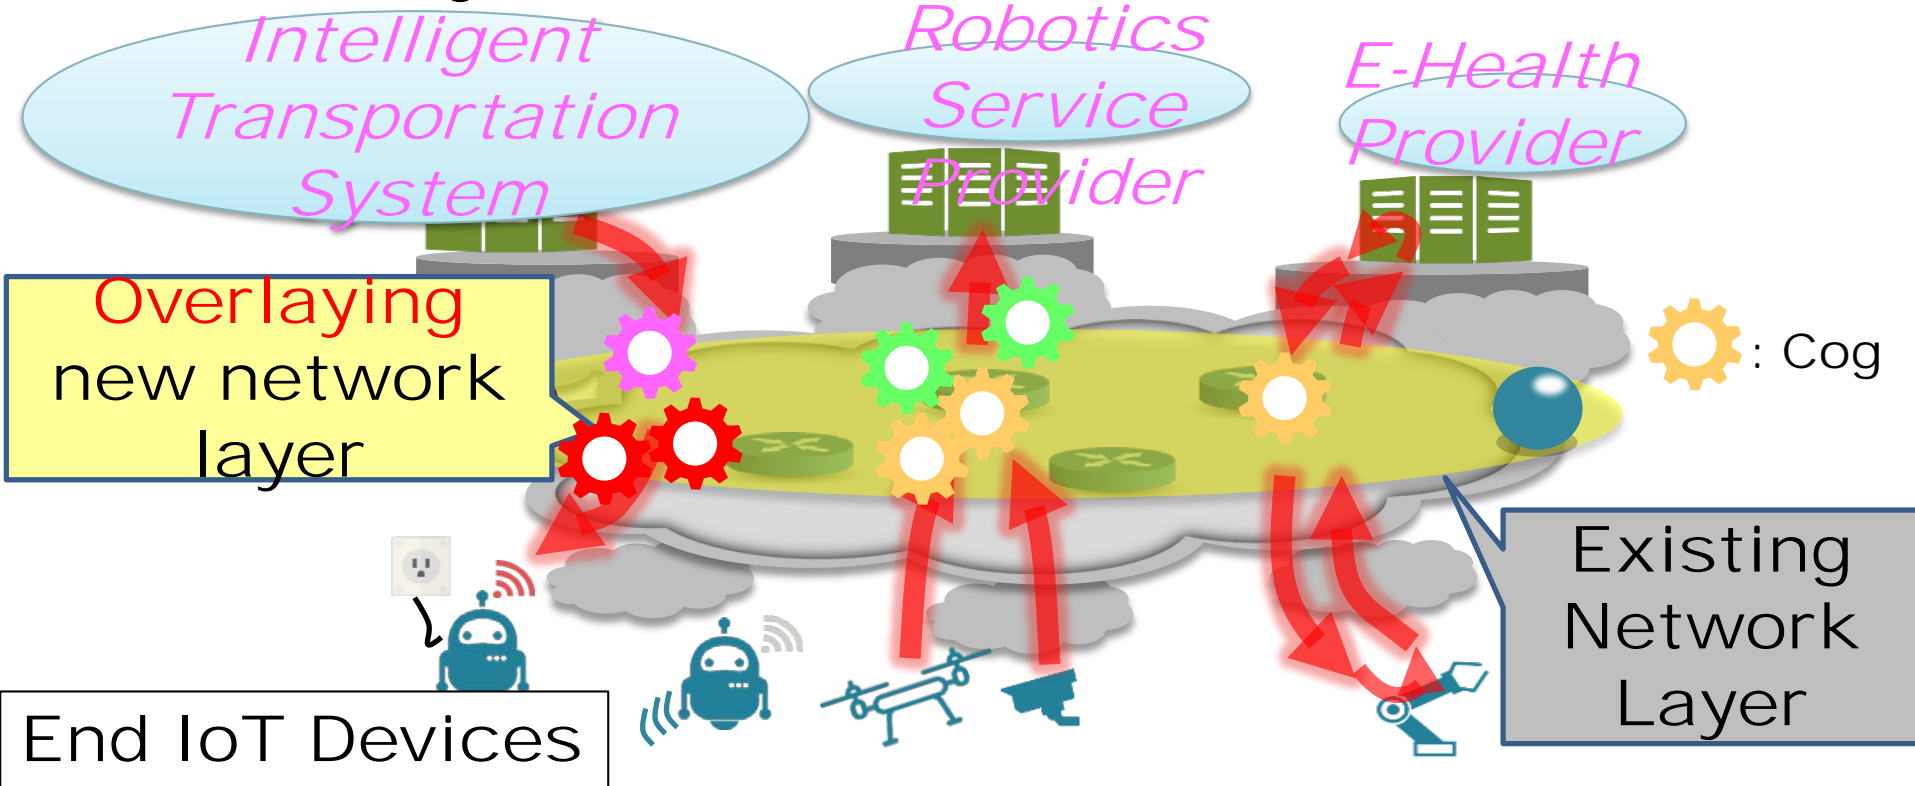

When we do a research on Next Generation Connected Social System, what kind of values can we create for a network service infrastructure?

Design of New Network functions by Cogs and Cog Networking

- A Cog is a middle entity to provide a value for connected social systems.

Social System Infrastructure Providers

- How do we find cogs? => Apply NDN.
