NAME

    sc_warts2csv — dump traceroutes collected by scamper in csv format

SYNOPSIS

    sc_warts2csv [*file ...*]

DESCRIPTION

    The **sc_warts2csv** utility provides a CSV dump of traceroute records in `warts`(5) files. **sc_warts2csv** does not support warts records other than traceroute; for non-traceroute records it simply produces no output.

EXAMPLES

    Given two `warts`(5) files named file1.warts and file2.warts, the following dumps all trace records contained within them:

```
sc_warts2csv file1.warts file2.warts
```

    Given a compressed warts file named file3.warts.bz2, the following dumps all trace records contained within:

```
bzcat file3.warts.bz2 | sc_warts2csv
```
