Notes

David Dagon, Georgia Institute of Technology
ISC/CAIDA Data Collaboration Workshop at MAAWG
October 2012

0) What?

1) Get a lab.
   BYOL problems (L1, PII, congestion)

2) Pre-distribute data.
   BL, botnet authority DNS, and motivating examples

3) Pre-distribute a VM image.
   E.g., build-essential && other utils

4) Minor notes re: tools and access
   http://rsfcode.isc.org/git/dnstui-proxy/

5) Permit exploration of data.
   Cluster-oriented nmsg tools vs. realities of student sources

6) For next time:
   Deploy daemons/traffic generators
